**Abstract**—The purpose of this study was to find out the potential of Sports in welcoming the Regional Sports Week event in Pinrang Regency at 2018 that can be seen from factors, such as; (1) Human Resources (2) Organization Performance (3) Sports facilities and equipment and (4) Government Funding Policy. This study was conducted a descriptive analysis of quantitative research design. The population is the Executive Board of KONI (Indonesian National Sports Committee) Sinjai Regency involving 24 people from each sports management. Data analysis technique used are descriptive analysis, frequency, cross tabulation and Bart Curve using SPSS 2017. The results showed that; The Top 10 Potential Sports in Sinjai Regency that is determined based on the condition of Human Resources, Organization Performance, Sports facilities and equipment, and Government Funding Policy are Karate ranked 1st with 317 points (13.2%) feasible, Futsal ranked 2nd with 312 points (12.9%) feasible, Basketball ranked 3rd with 248 points (10.3%) feasible, Football ranked 4th with 162 points (6.7%) not feasible, because the management is not active to do coaching although they fulfill other factors, Volleyball 148 ranked 5th with 148 points (6.1%) feasible, Archery ranked 6th with 145 points (6%) feasible, Pencak Silat ranked 7th with 135 points (5.6%) feasible, Rowing ranked 8th with points 122 ( 5.1%) feasible, Tennis ranked 9th with 113 points (4.7%) feasible and Athletics ranked 10th with 112 points (4.6%) feasible.

**Index Terms**— Achievement sports potential, facing regional sports week.

## I. INTRODUCTION

As mandated in Law No. 25 of 2000 (hereinafter referred to as Law No.25/2000) on the National Development Program of 2000 to 2004, especially in the field of sport are: 1) Development program and harmony of sports policy; 2) Sports correctional program; 3) Talent and sports seeding programs; 4) Sport performance improvement program.

In addition to Law of the Republic of Indonesia No.3 of 2005 on National Sports System. Then the run of regional autonomy that provides motivation to all of us in order to develop a region in a conducive atmosphere and democratic insight [1]–[4]. Furthermore, Sinjai regency policy focuses on improving human resources of Sinjai community especially in the physical education and sports in schools and society as a whole education subsystem that can improve the physical quality, character, ethics, discipline, and personality the people of Sinjai.

The measurement of sport performance achievement achieved by Sinjai Regency at Regional Sports Week event from year to year has been slightly decreased, in 2014 Regional Sports Week at Bantaeng Regency, the rank has been decreased from the fourth rank in 2010 Pangkep Regency with 7 gold, 6 silver, and 8 bronze, while in Bantaeng Regency, Sinjai ranked eighth and won 17 gold medals, 15 silver, and 19 bronze. The ranking obtained at the Regional Sports Week in 2014 Bantaeng Regency is very very unfavorable due to the decline in achievement, even allegedly there is the most disappointing thing, the achievement of this contingent has decreased when there are some contingents that there are athletes who get paid, the medal obtained is not the result of their maximum performance, it is a challenge for the board of sports in Sinjai Regency because they can not create athletes who can bring the name of their region let alone the national name.

Based on Sinjai Regency's achievements at the Regional Sports Week in Bantaeng Regency at 2014, it is very clear that there needs to be a harmony between the KONI Regional Board of Sinjai Regency, the management of sports branches and the policy holders in Sinjai Regency in the development of sports achievements, to support the development of potential sport program in Sinjai Regency. This is intended to occur a synergy in the development of achievement sports in Sinjai Regency and the efficient use of funds to increase sports achievement.

Some of the most influential factors in the development of sports achievements in Sinjai Regency are: 1) Human resources sports (trainers, athletes, referees and sports officials); 2) Sporting facilities and sports achievements; 3) The local government policy of Sinjai Regency; and 4) Organization performance in managing potential sports.

The 4 factors above are very influential in establishing sports branches that will be prepared in welcoming the Regional Sports Week in Pinrang Regency at 2018. In connection with that, the Local Government and Indonesian National Sports Committee Sinjai Regency as the highest management body in the development of sports achievements in the region needs to address this phenomenon and make steps for the development of sports achievements in Sinjai Regency. One of the fundamental steps that need to be done is the need for empirical data on human resources (athletes, coaches, and administrators of sports). Sports facilities and equipment, Local Government Policy of Sinjai Regency related to funding in setting strategy to prepare sports performance development in Sinjai Regency in welcoming the Regional Sports Week in Pinrang Regency at 2018. Because if this is not handled early on, Sinjai Regency will not get the maximum result of their performance at the Regional Sports Week event in the future. The determination of priority should be based on factors that influence achievement improvement.

## II. MATERIALS AND METHODS

This research was descriptive research [5]. The location of this research is conducted in Sinjai Regency, the variables in the research are: dependent variable is potential sport, independent variable is the supporting factor of sport achievement which includes: (1) condition of human resources (trainer, athlete, management and judge/referee), (2) condition of sports achievement facilities and equipment, (3) local government funding policy, (4) Sport organizations performance. The research informants were officials who were directly involved in sports coaching. Informants were used in this study because the person who gave the information had extensive knowledge about the situation in the field [6]. data collection technique and procedure such as questionnaires, open interviews, documentation, and observation. Analysis data techniques are descriptive analysis and differential statistical analysis [7].

## III. RESULTS AND DISCUSSIONS

### *Karate*

Karate was ranked 1st with 317 points (13.2%) of 24 sports which was arranged by KONIDA of Sinjai Regency that has 248 Human Resource, 248 organization performance, 51 Sports Facilities and 16 government policy. Based on the description above, it is suggested that this sport has good prospects in the future. Eventhough this sport has become the first priority, it does not mean that this sport does not try to make any improvement. From the data shown above, this sports is still need to improve their human resources, organization performance, facilities and equipment because the percentage indicates that the limited human resources to improve the quality of athletes, so it is expected for trainers to prepare themselves through training to become a professionals trainer and sports management in conducting coaching ranging from athlete nursery to athlete recruitment to prepare a reliable athlete in order to get a medal in the upcoming Sports Week Region event. So from now on, the board must fix and improve all aspects of both athlete recruitment, professional trainers, open management must be carried out with full responsibility.

### *Futsal*

Futsal was ranked 2nd with 312 points (12.9%) of 24 sports which was arranged by KONIDA of Sinjai Regency with 231 Human Resources, 34 Organization Performance, 45 Sports Facility and 2 government policy. Based on the description above, it can be argued that this sport has good prospects in the future. Although this sport has become the second priority, it does not mean that this sport does not try to make any improvement. From the data shown above, this sports is still need to improve their human resources, organization performance, facilities and equipment because the percentage indicates that the limited human resources to improve the quality of athletes, so it is expected that the coaches and sports management will be preparing the athletes more seriously through continuously and periodically. The improvement of facilities and equipment need to be at least at the local level so it can motivate athletes to practice seriously for the advancement and glory of futsal in the future. So from now on, the board must fix and improve all aspects of both athlete recruitment, professional trainers, open management must be carried out with full responsibility.

### *Basket Ball*

Basketball was ranked 3rd with 248 points (10.3%) of 24 sports which was arranged by KONIDA of Sinjai Regency that has 153 Human Resource, 61 organization performance, 32 Sports Facilities and 2 government policy. Based on the description above, it is suggested that this sport has good prospects in the future. Eventhough this sport has become the third priority, it does not mean that this sport does not try to make any improvement [8]. From the data shown above, this sports still need to improve their lack of human resources so the athletes who will prepare for the Regional Sports Week event is already on their top to compete with the coaching program continuous without having to put the senior anymore so there will be an athlete regeneration. Because based on the results of our survey, there are still athletes who can not dedicate medals due to the age, the organization performance should be improved to further empower the existing potential, facilities, and equipment because of the limited needs of all parties to develop this sport. To improve the quality of athletes, it is expected that the coaches and sports management has been preparing athletes in order to make their regional proud in the upcoming Regional Sports Week and expected to bring the name of South Sulawesi and can lift the name of the nation and the country.

### *Football*

Football was ranked 4th with 162 points (6.7 %) of 24 sports which was arranged by KONIDA of Sinjai Regency that has 94 Human Resource, 39 organization performance, 27 Sports Facilities and 2 government policy. Based on the description above, it can be said that this sport has good prospects in the future. Although this sport has become the fourth priority, it does not mean that this sport does not try to make any improvement. From the data shown above, this sports still need to improve their human resources by looking at the total population both in terms of athletes, as well as the quality coaches that are still lack for this sport even though this sport has been very famous in Sinjai, the organization's performance in this sport is not active whereas the activity of the organization is very important in preparing the athlete, from now on they have to start doing athlete recruitment and grouping the athletes through continuously coaching and systematic, because of the limited human resources to improve the athlete quality it is expected that the coach and sports management has been preparing athletes in order to make their regional proud in the upcoming Regional Sports Week and expected to bring the name of South Sulawesi and can lift the name of the nation and the country.

### *Volley Ball*

Volley Ball was ranked 5th with 148 points (6.1%) of 24 sports which was arranged by KONIDA of Sinjai Regency with 99 Human Resources, 40 Organization Performance, 8 Sports Facility and 1 government policy. Based on the description above, it can be argued that this sport has good prospects in the future. Although this sport has become the fifth priority, it does not mean that this sport does not try to make any improvement. From the data shown above, this sports still need to improve their human resources, organization performance, facilities, and equipment because the limited human resources to improve the quality of athletes, so it is

expected that the coaches and sports management will be preparing the athletes more seriously. It is important to conduct a training and coaching courses, and also to gather all potential athletes in early age until they are ready for the recruitment process in order to prepare them for the upcoming Regional Sports Week event hoping they will improve their previous ranking in the last event. And also to make their regional proud in the upcoming Regional Sports Week and expected to bring the name of South Sulawesi and can lift the name of the nation, the country and even in international.

### ***Pencak Silat***

Pencak Silat was ranked 7th with 135 points (5.6%) of 24 sports which was arranged by KONIDA of Sinjai Regency with 78 Human Resources, 32 Organization Performance, 23 Sports Facility and 2 government policy. Based on the description above, it can be argued that this sport has good prospects in the future. Although this sport has become the seventh priority, it does not mean that this sport does not try to make any improvement. From the data shown above, this sports still need to improve their human resources, organization performance, facilities, and equipment because the limited human resources to improve the quality of athletes, so it is expected that the coaches and sports management will be preparing the athletes more seriously. It is important to conduct a training and coaching courses, and also to gather all potential athletes in early age until they are ready for the recruitment process in order to prepare them for the upcoming Regional Sports Week event hoping they will improve their previous ranking in the last event. And also to make their regional proud in the upcoming Regional Sports Week and expected to bring the name of South Sulawesi and can lift the name of the nation, the country and even in international.

### ***Archery***

Archery Archery was ranked 6th with 145 points (6%) of 24 sports which was arranged by KONIDA of Sinjai Regency with 60 Human Resources, 57 Organization Performance, 26 Sports Facility and 2 government policy. Based on the description above, it can be argued that this sport has good prospects in the future. Although this sport has become the sixth priority, it does not mean that this sport does not try to make any improvement. From the data shown above, this sports still need to improve their human resources and organization performance. But the facilities and equipment need a serious improvement because the athlete who wants to practice have very limited time because the number of available facilities and equipment are still used by these archery lovers themselves. In addition, the limited human resources to improve the quality of athletes, so it is expected that the coaches and sports management will be preparing the athletes more seriously to make their regional proud in the upcoming Regional Sports Week and also they are expected to bring the name of South Sulawesi and can lift the name of the nation and country. By sending a trainer for training and courses for their every field in order to become a professional trainer.

### ***Rowing***

Rowing was ranked 8th with 122 points (5.1%) of 24 sports which was arranged by KONIDA of Sinjai Regency with 23 Human Resources, 95 Organization Performance, 3 Sports Facility and 1 government policy. Based on the description above, it can be argued that this sport has good prospects in the future. Although this sport has become the eighth priority, it does not mean that this sport does not try to make any improvement. From the data shown above, this sports still need to improve their human resources, organization performance, facilities, and equipment because the limited human resources to improve the quality of athletes, so it is expected that the coaches and sports management will be preparing the athletes more seriously to make their regional proud in the upcoming Regional Sports Week and also they are expected to bring the name of South Sulawesi and can lift the name of the nation and country.

### ***Tennis***

Tennis was ranked 9th with 113 points (4.7%) of 24 sports which was arranged by KONIDA of Sinjai Regency with 23 Human Resources, 20 Organization Performance, 69 Sports Facility and 1 government policy. Based on the description above, it can be argued that this sport has good prospects in the future. Because of the targets to improve the previous ranking in the upcoming Regional Sports Week event, they need too have a maturity in setting a priority sport that takes all aspect into account of both team sports and individual sports that can earn a lot of medals while considering the available funds. Although this sport has become a priority, it does not mean that this sport does not try to make any improvement. With the results of the distribution of existing data, it indicates that the facilities and equipment of tennis are very less. Therefore the sports management and local government should make any improvements starting from now to make some additional representative facilities and equipment to improve athlete's motivation in practice.

### ***Tennis***

Athletics was ranked 10th with 112 points (4.6%) of 24 sports which was arranged by KONIDA of Sinjai Regency with 59 Human Resources, 37 Organization Performance, 14 Sports Facility and 2 government policy. Based on the description above, it can be argued that this sport has good prospects in the future. Because of the targets to improve the previous ranking in the upcoming Regional Sports Week event, they need too have a maturity in setting a priority sport that takes all aspect into account of both team sports and individual sports that can earn a lot of medals while considering the available funds. Although this sport has become the tenth priority, it does not mean that this sport does not try to make any improvement.

From the data shown above, this sports still need to improve their human resources, organization performance; the total amount indicates that there are still limited human resources to improve the quality of athletes, so it is expected that the coaches and sports management will be preparing the athletes more seriously through continuously and periodically. The improvement of facilities and equipment need to be at least at the local level so it can motivate the athletes to practice seriously for the advancement and glory of athletic in the future.

#### IV. CONCLUSIONS

Sports achievement in Sinjai Regency is determined based on the condition of human resources (athlete, coach, referee/jury) the one that has the highest sports are Karate, Futsal, Basketball, Football, Volley Ball, Archery, Pencak Silat, Rowing, Tennis, and Athletics. Sports achievement in Sinjai Regency is determined based on the achievement of sports facilities owned by Sinjai Regency (quality and uneven amount) the one that has the highest sports are Karate, Futsal, Basketball, Football, Volley Ball, Archery, Pencak Silat, Rowing, Tennis, and Athletics. Sports achievement in Sinjai Regency is determined based on the organization performance that plays an important role in sporting sensibilities in Sinjai Regency. The highest sports are Karate, Futsal, Basketball; Football is not feasible because the management is not active to do coaching although they fulfill other factors, Volley Ball, Archery, Pencak Silat, Rowing, Tennis, and Athletics. Sports achievement in Sinjai Regency is determined based on the government funding policy to prepare the fund for coaching sports achievement in Sinjai Regency. The highest sports are Karate, Futsal, Basketball, Football, Volley Ball, Archery, Pencak Silat, Rowing, Tennis, and Athletics. The pattern of coaching that focuses on the priority sports by adjusting the condition of adequate sports facilities and equipment in terms of quality and quantity, and supported by the ability of good human resources is the main base in determining sports priorities and supported by professional organization performance and adequate funding that produce high-achieving athletes who can make the region, nation and country proud.
