Abstract: In the present time, the medical stores are looking for the services that are accurate and reliable for providing services to the customers and workers. Every store is making efforts to computerize their activities for providing better services to the customers. The medical store management system is the system used for medicine stock inventory in the medical stores. This system enables the manager of the store to record and manage all activities of the medical shop. This system also enables the workforce of the medical.

Store to offer their services in a manner which is more efficient and systematic which also improve of the medical store. This also helps in analyzing the performance of the store. the medical store management software can organize the daily activities in the medical store such as information of tablets, billing, Details of stock and others. The medical store management software enables to maintain the details of purchase stock by the store and the details of the selling stock by customer wise. This software generates the automated bill for every sale and also generate the reports for the customer detail, sell and stock. The use of this system reduces the time and effort involved in enables the managers to easily record the details of their suppliers and assess them whenever required. The use of medical store management system improves the efficiency of staff of the store as it provides information about the medicines and its location in the store. the medical store management system can give ease to the medical stores in managing their paper.

Work, payment details and inventory online along with retrieving managing inventory of the medical store. It also reduces the hard work involved in using paper for record keeping. The use of this system them.

Keywords: E-medical Supply, php, xaamp, web- application.

1. INTRODUCTION
The medical store management system is the system used for medicine stock inventory in the medical stores. This system enables the manager of the store to record and manage all activities of the medical shop. This system also enables the workforce of the medical store to offer their services in a manner which is more efficient and systematic which also improve of the medical store. This also helps in analyzing the performance of the store. the medical store management software can organize the daily activities in the medical store such as information of tablets, billing, details of stock and others. The medical store management software enables to maintain the details of purchase stock by the store and the details of the selling stock by customer wise. This software generates the automated bill for every sale and also generate the reports for the customer detail, sell and stock. The use of medical store management system improves the efficiency of staff of the store as it provides information about the medicines and its location in the store. the medical store management system can give ease to the medical stores in managing their paper work, payment details and inventory online along with retrieving them.

2. Literature Review

3. Problem analysis and Likely Benefits based on Literature Reviews
1. The risk regarding the system is the main constraint of this project which is relevant to the compatibility of the program with system. The system constraint is caused due to the processor, hard disk and RAM used in developing the medical store management system.
2. The next risk is related to the quality of the project. The maintenance of quality in a project is important for achieving the outcome of the software. The purpose of designing the medical store management system is to reduce the time and space involved in record keeping and inventory management in medical stores. The reduction in quality can impact on the performance of software.
3. The scope is the last constraint of this project. The project is need to full fill its scope as it makes the project cost effective ad maintain the quality of it.
3. **Objectives**
The objective of this project is to organize the medical store details like stocks, medicines, expense, sales and others. The project mainly developed at the administrative end and therefore it only provides access to the administrator of the store. The medical store management system is developed as application program for reducing manual work managing medical store, it also helps in keeping track of all the details regarding the expense, stocks and sales.

- To provide searching facilities on the basis of various factors like stocks and theirs.
- To manage the user details for analyzing sales and expenses.
- To keep track and manage all information.
- To show the description and information of the stocks and others.
- To enhance the efficiency of management in medical store.
- To monitor the information regarding the transaction of the sales.
- To improve the function of edit, add and update the records for the proper resource management.

4. **Methodology Used:**

- **Module 1: Dashboard.**
  - Display offers.

- **Module 2: Supplier login module**
  - Register.
  - Add/edit/delete medicine.
  - Add/edit/manufacture.
  - Add/edit/delete offers of medicine.
  - Display stock.
  - Feedback.

- **Module 3: Customer user login**
  - Registration.
  - Search medicine.
  - Display medicine with shopkeepers.
  - Add to cart.
  - Generate bills.
  - Place order.
  - Track record.
  - Find medicine shop location.
  - Feedback.

- **Module 4: Delivery user login**
  - Registration.
  - Address details with GPS.
  - Check order.
  - Update delivery status & Release.
  - Get payment.

- **Module 5: Admin panel**
  - Display all reports supplier/customer.
  - Automation system.
  - Placed order.
5. Facilities Required

<table>
<thead>
<tr>
<th>Name of Equipment</th>
<th>Specification</th>
<th>Cost</th>
<th>Available</th>

</tbody>
</table>

6. Feasibility Study

- **Operational Feasibility** - Authorized users can easily access the details.
- **Technical Feasibility** - Store information related website.
- **Economic Feasibility** - Building low-cost medicine supply website.
- **Reliable** - As website is developed hence we will get results any time anywhere fancy place on the world.

Conclusion
The medical store management system helps in gathering the perfect in the details. The collection and storage of data with the help of this project. Will be sensible, obvious and simple. It also helps in understanding the management of the previous time vividly. It also helps in performing the various Functions of medical store. The medical store Management system is developed to provide ease in documentation, keeping records, maintaining inventory and payment in the medical store which requires proper record keeping and management. The project also helps the manager or administrator of the medical store to assess the stored information in the time of need such as for contacting the suppliers.
